Biography

Ioannis Papatotiriou, male, medical geneticist, born 1973 in Munich, Germany, he graduated from Medical school of Aristotle University of Thessaloniki in 1997. He went on to undertake postgraduate training in molecular medicine (MSc) at the University of Westminster of London (Distinction pass), then MSc in molecular oncology at Nottingham University and a doctorate as Medical Geneticist in the University of Zurich. He worked as scientific fellow in the department of Human Physiology and Medical Biochemistry in Medical school of Thessaloniki. He completed his promotion (M.D., PhD) in MLU University in the area of TKIs in human cancer cells lines. Between 2001 and 2004 he established Arzt Genetik Zentrum in Thessaloniki where he was a director. Since May 2004 he is a CEO and medical director of **RGCC SA- Research Genetic Cancer Centre SA** (www.rgcc-genlab.com) in Greece where the major field of expertise is molecular oncology in the entity of Cancer stem cell like. His main interest is cancer genetics with a major focus on chemosensitivity testing and developing screening tests. His research activities lie in the field of cancer drug design and evaluation and in the development of innovative methods of cancer gene or molecular targeted therapies.
